

## IDS and XML

Wednesday, 01 August 2007

Last Updated Wednesday, 01 August 2007

It's been a while I did not blog, although this is not a blog ;-).

Well, I just wanted to let you know that the new IDS (v11 or Cheetah) has some nice XML features and I wrote an article about them on DB2mag.com, with plenty of examples. XML is cool, IDS is cool, Java is cool. You'll see why there.

Ok &ndash; back to work, I have a huge list of todos for InformixMag.com, GreenIvory, RedLion, IIUG, and many, many more!
